PROFESSIONAL SUMMARY

Final-year Computer Science and Engineering student at R. P. Shaha University with hands-on software development experience through an ongoing internship at Leo Tech BD and multiple independently delivered web and graphics projects. Skilled in HTML5, CSS3, JavaScript, responsive design, and object-oriented programming. Proven ability to build polished, user-focused interfaces and complete full project lifecycles from concept to functional delivery. Seeking a junior software engineering or front-end role, with strong interest in graduate studies abroad.

EXPERIENCE

Software Development Intern — Leo Tech BD

July 2026 – Present

Dhaka, Bangladesh

- Learning professional workplace conduct and the fundamentals of working in a software industry, including team communication and project workflows.
- Gaining exposure to client handling, requirement gathering, and business-side considerations behind software projects.
- Practicing time and schedule management while collaborating with both senior and junior team members on ongoing tasks.

KEY PROJECTS

KacchiKhacchi — Responsive Food Ordering Platform

HTML5, CSS3, JavaScript, Responsive Design, UI/UX | [View on GitHub](#)

- Designed and developed a complete food-ordering website inspired by a local Narayanganj business, featuring clear menu hierarchy, polished brand experience, cart functionality, and an intuitive flow from browsing to ordering.

Jobly — Job Application Tracker

HTML5, CSS3, JavaScript, Responsive UI | [View on GitHub](#)

- Built a focused productivity tool that allows users to log, organize, and track job applications through a clean, status-driven interface.

BookManagement — CRUD Management System

HTML5, CSS3, JavaScript, CRUD Operations | [View on GitHub](#)

- Developed a dynamic book management system centered on structured data handling, full CRUD workflows, and straightforward user interactions.

Gorur Haat Simulation — Computer Graphics Project

C++, OpenGL, Computer Graphics, Animation | [View on GitHub](#)

- Created an interactive 2D OpenGL simulation of a traditional cattle market with custom scene composition, animated objects, and event-handling logic.

TECHNICAL SKILLS

Languages & Web	HTML5, CSS3, JavaScript, C, C++, Java, Responsive Web Design, UI Design
Databases & Tools	MySQL, Git & GitHub, Visual Studio Code, Code::Blocks, LaTeX
Languages Spoken	Bengali (Native), English (Professional Working Proficiency), Hindi (Basic)

EDUCATION

B.Sc. in Computer Science and Engineering

Expected 2026

R. P. Shaha University (RPSU), Narayanganj, Bangladesh • CGPA: 3.00 / 4.00 (up to 7th Semester)

Relevant Coursework: Software Engineering & Web Technologies, Database Management Systems, Object-Oriented Programming, Data Structures & Algorithms, Artificial Intelligence

Higher Secondary Certificate (HSC – Science)

2021

Government Mohila College • GPA: 5.00 / 5.00

Secondary School Certificate (SSC – Science)

2019

Narayanganj Preparatory School • GPA: 5.00 / 5.00

KEY STRENGTHS

Analytical Problem-Solving • UI/UX Optimization • Rapid Technical Adaptability • Collaborative Teamwork • Front-End Development • Software Engineering Fundamentals
